PAUL OSAMUYI OSAKUE

+234(0)7065655095 | paulonko000@gmail.com | Portfolio | LinkedIn **_GIS ASSISTANT_**

Edo, Nigeria.

PROFESSIONAL SUMMARY

Results-driven Data Analyst and GIS Assistant with proven ability to translate complex data into clear, actionable insights that drive business growth. Leveraging geographical expertise and technical proficiency in QGIS, MapInfo Pro, Excel, PostgreSQL, Python, and JavaScript, I produce operational maps, build dashboards, create reports, and validate data with consistent 98.4% accuracy in fast-paced, remote-friendly environments. Passionate about curating meaningful stories from raw data while maintaining integrity across cross-functional teams.

CORE COMPETENCIES

Data Analysis & Visualization: Advanced Excel (pivot tables, metric tracking), Looker, PowerBI dashboards, and spreadsheet management for translating data into clear business insights.
Technical Proficiency: Python for data analysis, PostgreSQL database management, JavaScript fundamentals, and comfort with multiple data validation tools.
Cross-Functional Collaboration: Proven ability to partner with diverse teams across roles and departments in remote work environments.
Process Optimization: Build efficient workflows, manage high-volume projects, and create guides for consistent quality assurance.
Communication: Translate technical findings into clear stories and one-pagers for stakeholders with varying technical backgrounds.

WORK EXPERIENCE

GIS ASSISTANT
Okomu Oil Palm Company **Feb. 2026 – Present**

- Produce maps vital to the growth and day-to-day operations of the company.
- Perform comparative analysis and cleaning of geospatial data using QGIS, MapInfo Pro, and Excel.
- Capture field data using drones (DJI Matrice 4T, Mavic 3), a rover, and Trimble and Garmin GPS units.
- Collaborate with a team of trained personnel with several years of experience to deliver reliable geospatial outputs.

DATA ANALYSIS INTERN
HNG (Remote) **Jan. 2025 – Jan. 2026** (12 months)

- Process and validate large datasets with 98.4% accuracy using advanced database systems and Excel in a fast-paced, remote-friendly environment.
- Build interactive dashboards and create detailed reports that translate complex data into clear insights for cross-functional teams.
- Manage spreadsheet systems and curate data visualization content to support business decisions.

- Partner with remote teams across multiple time zones to meet strict project deadlines with consistent quality.
- Implement quality control measures and guides to ensure data integrity and accuracy across all deliverables.
- Develop comfort with various data tools while maintaining flexible hours to accommodate team requirements.

ASST. OPERATIONS MANAGER
Global Procurement and Logistics, Garki, Abuja F.C.T. **Sep. 2023 – Jul. 2024** (11 months)

- Managed client accounts and built comprehensive CRM databases to track potential leads and create targeted outreach strategies.
- Translated customer needs into actionable insights through strategic data analysis and metric tracking.
- Created clear reports and one-pagers to communicate performance against monthly targets to cross-functional stakeholders.
- Validated order information and maintained organized spreadsheets with exceptional accuracy for inventory management.
- Partnered with team members across roles to manage responsibilities and meet departmental goals in a fast-paced environment.
- Built strong rapport through clear communication, resulting in improved customer satisfaction and repeat business.

TECHNICAL SUPPORT REPRESENTATIVE
Primed E-Health, (Hybrid) Abuja F.C.T. **Jul. 2023 – Sep. 2023** (3 months)

- Conducted outbound calls to users, collecting and validating customer data to build comprehensive service profiles.
- Managed CRM systems with consistent accuracy, creating organized records to track resolution progress.
- Translated technical concepts into clear, user-friendly language for customers with varying comfort levels.
- Curated customer feedback data and created reports on service trends and potential improvement areas.
- Exceeded daily metric targets while maintaining high satisfaction ratings in a fast-paced, hybrid work environment.

DATA ENTRY OFFICER – NYSC
Airwaves, Wuse, Abuja F.C.T. **Aug 2022 - May 2023** (10 months)

- Built and maintained comprehensive spreadsheets to track customer information and create targeted outreach campaigns.
- Validated data entries and prepared detailed reports with 99.5% accuracy for administrative documentation.
- Managed account setups and translated service requirements into clear, actionable work orders.
- Created content for customer communications and curated information for various departments.
- Partnered with teams to ensure consistent data quality and participated in regular training to build product knowledge.

EDUCATION

University of Benin, Edo State **2017 - 2021**
Social Sciences

Bachelor of Science in **Geography & Regional Planning**

TECHNICAL SKILLS

- **GIS & Geospatial:** QGIS, MapInfo Pro, drone surveys, rover, Trimble and Garmin GPS.
- **Data Analysis & Visualization:** Advanced Excel (pivot tables, data analysis, dashboards), PowerBI, Looker fundamentals, metric tracking and reporting.
- **Database Management:** PostgreSQL for data validation, quality control systems, and building efficient data pipelines.
- **Programming:** Python for data analysis and automation, JavaScript fundamentals for web-based tools and interactive dashboards.
- **Business Intelligence:** Create clear reports, one-pagers, and stories from complex datasets; translate technical findings for diverse stakeholders.
- **Project Management:** Remote collaboration tools, spreadsheet management, content creation, and document processing.
- **Data Quality:** Build validation frameworks, manage data integrity checks, and curate consistent documentation guides.

CERTIFICATIONS

- HNG | HNG Internship 12 - Data Analysis Track | Mar 2025
- sololearn | Python Core | Sep 2017
- sololearn | Introduction to JavaScript | Apr 2023
- cisco | Introduction to Cybersecurity | Mar 2024
- UNIBEN | B.Sc. Geography & Regional Planning | Nov 2021
- NYSC | Certificate of National Service (CNS) | Jun 2023

ACHIEVEMENTS

✅ Process Automation: Automated a QGIS workflow with Python (PyQGIS), splitting a single shapefile into 600 separate layers named after each farmer in the attribute table, saving hours of manual work.

✅ Operational Excellence: Improved system efficiency by 25% through strategic data management implementation and building optimized workflows.

✅ Consistent Quality: Maintained 98.4% accuracy rate across all data processing and validation projects with fast turnaround times.

✅ Remote Work Proficiency: Successfully managed high-volume projects in virtual, remote-friendly environments with flexible hours.

ADDITIONAL QUALIFICATIONS

Work Style: Comfortable with remote work, flexible hours, and fast-paced environments. Strong eligibility for roles requiring cross-functional responsibilities and independent project management.

Core Strengths: Build data-driven solutions, create compelling visualizations, manage multiple projects, validate complex datasets, curate insights, and translate findings into clear business stories.
